## Objective

In addition to technical skills, I bring a strong problem-solving mindset and an analytical approach to my work. I enjoy tackling challenges head-on and finding innovative solutions that optimize performance, security, and usability.

## Experience And Internships

### Avyaan Management Pvt.Ltd

Jan 2023 – Mar 2023

Software Developer Trainee

Bhopal

- During my internship at Avyaan Management Pvt.Ltd., I developed a voice assistant which is based on JavaScript and answer some predefined question about the company and also developed some festival special themed web pages for their website and designed and integrated voice assistance in JavaScript.

### Rages Technology Pvt. Ltd.

Feb 2022 – Apr 2022

Front End Developer

Bhopal

- During my internship at Rages Technology Pvt. Ltd., I gained hands-on experience in translating design concepts into responsive web interfaces using HTML, CSS, and JavaScript. I honed my skills in React.js, developing interactive components that enhanced user engagement and collaborated closely with cross-functional teams to ensure consistent design implementation and optimal website performance.

### CRTD Technologies Pvt. Ltd.

July 2022 – Oct 2022

Front End Developer

Bhopal

- Designed and implemented responsive user interfaces for web applications, applying modern HTML, CSS, and JavaScript techniques and Optimized website performance by employing efficient coding practices and minimizing resource load times.

## Academic Projects

### Personal 3D Portfolio | *ReactJs, ThreeJs, JavaScript, BootStrap, Vite, VsCode, Git*

June – Aug 2023

- Designed a portfolio that encompasses a range of projects, from personal web applications to collaborative ventures, showcasing my versatility in adapting to different design aesthetics and development challenges.

### Voice Assistant | *Html, CSS, JavaScript, BootStrap, VsCode. Git*

Jan – Mar 2023

- The Voice Assistant is a dynamic and interactive web application developed using a combination of JavaScript, HTML, CSS, and the Bootstrap framework. Its primary purpose is to provide users with quick and accurate answers to a set of predefined questions related to a specific company.

### TNP Management System | *JavaScript, Php, Html, Css, mySql, VsCode, Git*

Oct – Dec 2022

- This system aims to automate and streamline organizational processes, ensuring a paperless admission experience. It efficiently manages student data, facilitates communication with registered students regarding company details, offers comprehensive student account management, enables seamless data viewing, generates statistical reports, and enhances interview and selection procedures, leading to improved counseling effectiveness and reduced administrative load.

### Railway Reservation System | *Language C Git*

Dec 2020 – Jan 2021

- This is a beginner level desktop software using C language which is used to generate railway tickets using local database to store train and passengers information.
